

Provocation tests uniform; restraint its badge of courage

Dr. Ravi Chaturvedi

The Delhi Police carries a responsibility unlike that of any ordinary police force. It guards not merely a city, but the national capital, the seat of Parliament, the constitutional institutions of the Republic, the Union Government, the diplomatic community and millions of citizens who live, work and travel through Delhi. Its motto, Shanti, Seva, Nyaya; Peace, Service, Justice, is therefore more than an inscription. It is a solemn philosophy of democratic policing. That responsibility becomes immeasurably arduous when the Capital surges with mass demonstrations. Protest is democracy's sacred right, dissent its living pulse. Yet when protest descends into violence - barricades shattered, stones flying, policemen assaulted and public property imperilled - the police face a delicate constitutional duty: to restore order without permitting anger to become the language of authority.

The Delhi Police must constantly walk this narrow line. It must protect Parliament and other vital institutions, secure the movement of dignitaries, maintain traffic and public safety, and at the same time respect the citizen's right to assemble and express disagreement. Before public gatherings, officers engage with organizers, understand their plans and assess the possible implications for law and order. Such engagement represents an effort to preserve both democratic expression and public peace. But the true test begins when peaceful protest turns turbulent.

In a violent confrontation of

considerable scale, the police uniform can become a target of fury. Officers may face insults, threats, physical assault and the pressure of a crowd moving with its own momentum. Yet the officer cannot surrender discipline to provocation. A stone may strike a helmet; a barricade may fall; an abusive voice may challenge authority—but the uniform must remain governed by law. That is where restraint becomes an extraordinary form of courage.

Behind every injured policeman stands a family whose anxiety cannot be measured in official statistics. A damaged helmet is equipment for an institution; to a wife, child, father or mother waiting at home, it is a frightening symbol of how close danger came to someone they love. The ranks - constable, ASI, ACP or senior officer - may distinguish responsibility, but they do not diminish human vulnerability. Every officer in the line of duty is somebody's son, daughter, husband, wife or parent.

The reported injuries suffered by police personnel during violent demonstrations therefore deserve recognition alongside every legitimate demand for accountability. If allegations of excessive force arise, they must be examined fairly. Democratic policing requires accountability. But democracy also requires acknowledging the dangers borne by those who stand between disorder and the institutions they are sworn to protect.

In this demanding atmosphere, Delhi Police Commissioner Satish Golcha deserves appreciation for the discipline and restraint maintained by the force. Leadership

during such moments is not demonstrated merely by arrests, barricades or dispersal orders. Its deeper measure lies in keeping personnel professional and proportionate when they themselves are being attacked or provoked.

A police force is often judged not by dramatic action, but by disasters averted: institutions remain secure, clashes do not spiral, public assets endure, citizens reach home unharmed and constitutional life proceeds undisturbed. Such triumphs seldom command headlines. Restraint is not frailty; it is disciplined strength - the courage to uphold law without surrendering to provocation.

The Delhi Police, particularly during protests of exceptional magnitude and intensity deserves to be judged not only by the force it possesses, but by the force it can control. Its men and women must be firm without becoming harsh, vigilant without becoming oppressive, and decisive without surrendering proportionality.

The Capital needs a police force capable of absorbing provocation without losing its moral centre. In moments when tempers rise, barricades shake and stones fly, the finest quality of the uniform is not how much force it can unleash, but how much force it can restrain. That difficult art of self-control is not weakness. It is courage in its most disciplined form.

And in that spirit, the Delhi Police under Commissioner Satish Golcha deserves recognition and respect—for demonstrating that, even in the face of violent provocation, authority can remain calm, lawful and humane. Shanti, Seva, Nyaya is thus not merely a motto. In turbulent times, it becomes a test - and restraint is perhaps its noblest answer.

Deadline extended for M.Ed admissions in govt colleges

Chennai, Aug 29: The Tamil Nadu government has extended the online application deadline for second-phase M.Ed admissions in government colleges of education for the 2026-27 academic year till September 10, giving another opportunity to students who missed the earlier deadline. Higher Education Minister P. Viswanathan said eligible students can submit their applications

through the TNGASA admission portal from August 31. Online registration for M.Ed admissions began on August 11 and the initial application window closed on August 20. Candidates who applied within the original deadline will be admitted based on merit, with the admission process beginning on August 27. Classes for M.Ed students are scheduled to commence on Sep-

tember 1. Admission-related information will be communicated to applicants through SMS and email. The extension till September 10 is intended to facilitate second-phase admissions and provide another chance to eligible candidates who could not apply during the initial registration period, the Minister said.

StudyIn opens student experience centre in Chennai

Chennai,Aug 29: International education onsultancy StudyIn has opened its flagship Student Experience Centre in Chennai, offering students counselling, university application assistance, scholarship guidance, visa support and other services for pursuing higher education abroad. The Chennai facility is part of StudyIn's expansion in India and follows the opening of its flagship centre in New Delhi in May 2026. The company also plans to open a flagship centre in Bengaluru later this year. StudyIn CEO Rob Grimshaw said Chennai was an important market for international education and that the new centre would enable the company to work more closely with students, families and university partners. The centre will provide personalised counselling, guidance on study destinations,

university applications and scholarships, visa assistance, foreign-language test preparation, workshops on emerging courses and careers, pre-departure briefings and post-admission support. Lakshmi Iyer, Chief Client Officer and Chairperson of StudyIn India, said the centre was aimed at making international education more accessible and easier for students and families to navigate. The facility includes dedicated counselling and consultation spaces, collaborative discussion areas and student engagement zones designed to help students explore overseas education and career options.

StudyIn currently has a presence in major cities including New Delhi, Mumbai, Bengaluru, Hyderabad, Chennai, Pune, Kolkata, Ahmedabad, Kochi and Gurugram, besides several emerging education hubs. The Chennai centre is part of its plans to expand its student-support network across India.

Revenue Augmentation Committee Chairman and economist Montek Singh Ahluwalia chaired a consultative meeting with trade and industry associations, public finance experts, multilateral agencies, academic institutions and the public in Chennai on Thursday. Finance Secretary M.A. Siddique, committee members and senior officials were present.

Ensure quality food grains at ration shops: Ranipet Collector

Ranipet, Aug 29: Officials of the Tamil Nadu Civil Supplies Corporation (TNCSC) have been directed to ensure that quality essential commodities are supplied to the public through all fair price shops in Ranipet district. Collector N. Priya Ravichandran issued the direction after inspecting the TNCSC taluk process godown at Melnethappakkam in Kalavai taluk on Wednesday.

During the inspection, the Collector checked the quality, weight and stock of essential commodities stored at the godown for distribution under the Public Distribution System. She instructed officials to maintain prescribed quality and quantity standards and ensure that commodities supplied from the godown reach fair price shops in proper condition for distribution to cardholders. TNCSC Senior Regional Manager Ekambaram and other officials were present during the inspection.

GCC orders daily upkeep of roads, public facilities in Royapuram

Chennai, Aug 29: Greater Chennai Corporation officials have been directed to ensure daily sanitation, proper placement of garbage bins and regular maintenance of greenery along road medians in parts of the Royapuram zone. GCC North Region Deputy Commissioner Swetha Suman issued the directions during an inspection of civic facilities and development works in Ward 61 on Thursday. At Gandhi Irwin Road in Egmore, she inspected sanitation work, garbage-bin locations, a free public toilet and plants maintained along the road median.

Officials were instructed to ensure that garbage bins were kept within designated collection points and public toilets were maintained properly. She also directed workers to water plants along road medians daily and carry out regular pruning and maintenance. On Pantheon Road, the Deputy Commissioner reviewed the proposed establishment of a central kitchen for the school breakfast scheme. She also inspected the Urban Primary Health Centre and the streetlight division office at Pudupet. Corporation officials accompanied her during the inspection.

Banks told to verify EC before releasing property loans

Chennai, Aug 29: Banks in Tamil Nadu have been asked to release loans against properties only after verifying that details of existing mortgages are reflected in the Encumbrance Certificate (EC), as part of measures to prevent borrowers from fraudulently obtaining multiple loans on the same property. The State government, through a letter dated August 12, has asked the State Level Bankers' Committee (SLBC) to issue instructions to all banks operating in Tamil Nadu to ensure verification of mortgage registration details in the EC

before disbursing loans. The move is aimed at preventing instances in which multiple loans are obtained against the same property by registering different mortgage documents. Meanwhile, the Registration Department has introduced online registration of certain documents, including Memorandum of Deposit of Title Deeds (MODT) and mortgage deeds, through Presenceless Registration under the Anywhere Registration initiative.

NOTICE OF 31ST ANNUAL GENERAL MEETING & REMOTE E-VOTING INFORMATION
Meeting Details
Notice is hereby given that the 31st Annual General Meeting (AGM) of Indowind Energy Limited will be held on Friday, September 25, 2026, at 4:00 P.M. (IST) via Video Conferencing (VC) / Other Audio-Visual Means (OAVM) provided by CDSL, in compliance with the Companies Act, 2013, SEBI (LODR) Regulations, 2015, and applicable MCA/SEBI circulars, to transact the business set out in the AGM Notice dated August 12, 2026. Physical attendance is not provided; members attending via VC/OAVM will be counted towards quorum u/s 103 of the Companies Act, 2013. Availability of AGM Documents
Electronic copies of the Annual Report 2025–26 and AGM Notice are available on the websites of the Company (indowind.co.in), BSE (bseindia.com), NSE (nseindia.com), and CDSL (evotingindia.com). Documents are sent electronically to registered email IDs. In accordance with SEBI circular dated May 13, 2022, hard copies will be sent only upon specific request.
Key Information & Action Points
• Record Date: September 19, 2026 (fixed by the Board on August 13, 2026) to determine voting eligibility.
• Remote E-Voting: Provided via CDSL prior to and during the AGM for all eligible members.
• Email Registration (Demat Mode): Update email details with your respective Depository Participant (DP).
• Email Registration (Physical Mode): Submit Form ISR-1 to Bigshare Services Pvt. Ltd. (Office No. S6-2, 6th Floor, Pinnacle Business Park, Mahakali Caves Road, Andheri East, Mumbai - 400093; Email: shwetass@bigshareonline.com / investor@bigshareonline.com).

Fungal toxins found in 212 plant-based foods

Scientists have found naturally occurring fungal toxins in every one of 212 plant-based meat alternatives and beverages tested in a survey of products sold in the United Kingdom, raising questions about long-term exposure.

The study, led by the University of Parma in Italy and co-authored by Cranfield University, examined 92 plant-based meat alternatives and 120 plant-based beverages bought from UK retailers. Products included burgers, vegetarian chicken pieces, vegan sausages and drinks made from oats, almonds and soy.

Researchers tested the samples for 19 mycotoxins, toxic compounds produced naturally by certain fungi. Every product contained at least one mycotoxin, while many contained several different toxins at the same time.

Mycotoxins can enter plant-based foods because ingredients

such as grains, legumes and seeds may be exposed to mould during cultivation, harvesting or storage. The researchers found that plant-based meat alternatives contained higher toxin concentrations than plant-based beverages.

Despite the widespread detection, the study offered an important reassurance: concentrations measured in the products were below recommended European Union guideline levels. Researchers said the findings should therefore not alarm consumers or discourage them from eating plant-based foods.

The greater concern, they said, is cumulative exposure. Although a single serving is unlikely to pose a problem, regularly consuming large quantities of products containing low levels of several mycotoxins could potentially increase exposure over time.

Previous research has linked

significant mycotoxin exposure with liver and kidney damage, suppression of the immune system and certain cancers. However, the new study does not show that eating the tested products causes these health problems.

The researchers said the findings underline the need for continued monitoring, as plant-based alternatives become increasingly popular. Some of these newer products are complex mixtures of multiple ingredients, making contamination patterns more difficult to assess.

Andrea Patriarca, a Senior Lecturer in Mycology at Cranfield University, said mycotoxins occur naturally in foods and cannot be completely avoided. He stressed that consumers should not be

frightened, but said better systems are needed to manage risks and improve food safety.

The team is now working to evaluate how different dietary habits may influence overall exposure. The findings could help food-safety authorities refine risk assessments and assist producers in improving monitoring from farms to finished products.

Published recently, the research highlights a challenge for the expanding plant-based food industry: ensuring that the move towards alternative proteins is matched by effective surveillance of naturally occurring contaminants.

Waist size may reveal health risks that BMI misses

A simple tape measure around the waist may reveal obesity-related health risks that body mass index, or BMI, can miss, according to new research suggesting doctors may not need complicated combinations of measurements to identify unhealthy levels of body fat.

Researchers at Rutgers Health analysed data from 1,900 US adults aged between 20 and 59 and compared several obesity screening methods against a highly accurate body-fat assessment. The findings, published in JAMA Network Open, showed that waist circumference alone performed almost as well as more complex approaches.

BMI has long been used to assess obesity because it is easy to calculate from a person's height and weight. However, it does not directly measure body fat, distinguish between fat and muscle, or indicate where fat is stored.

That limitation can be important because the location of body fat is linked to health risks. A wider waist can signal unhealthy abdominal fat associated with an increased risk of diabetes, heart disease, stroke and cancers.

The study compared a recently proposed framework that combines BMI, waist circumference, waist-to-height ratio and waist-to-hip ratio with simpler alternatives. While the more detailed system identified more people with excess body fat, the researchers found that simpler methods offered comparable overall accuracy. Using either BMI

or waist circumference provided a good balance between identifying people with obesity and avoiding false-positive diagnoses. Waist circumference on its own also performed strongly, while BMI alone missed a substantial number of people who met body-fat criteria for obesity.

The researchers said the simplicity of waist measurement could make it particularly useful in everyday medical practice. Hip circumference, required for more complex screening systems, is not routinely measured during clinical visits, whereas a waist measurement is quick, inexpensive and increasingly included in health guidelines.

Lead author Aayush Visaria said people should pay attention to signs such as needing to loosen a belt or buy larger trousers, although clothing size is not a substitute for a proper measurement.

The findings could encourage wider routine use of waist circumference alongside body weight and BMI, helping doctors identify people who may face elevated health risks earlier.

The researchers stressed that the study does not mean BMI should be abandoned. Instead, it highlights the value of combining simple, practical measures. For patients and clinicians alike, the humble tape measure may offer an additional warning sign that is easy to use and potentially important for preventing obesity-related disease.

Experimental eye drops help blind mice see again

Scientists have developed experimental light-activated drugs that restored light perception and visually guided behaviour in blind mice, raising hopes that a simple eye-drop treatment could one day help people with degenerative forms of blindness.

The research, led by the Institute for Bioengineering of Catalonia (IBEC), focuses on diseases in which the eye's light-sensing photoreceptor cells gradually deteriorate and die. These include age-related macular degeneration and retinitis pigmentosa, major causes of vision loss worldwide.

When photoreceptors are destroyed, however, much of the deeper neural circuitry in the retina can remain intact. The challenge for scientists has been finding a way to make this surviving circuitry respond to light again.

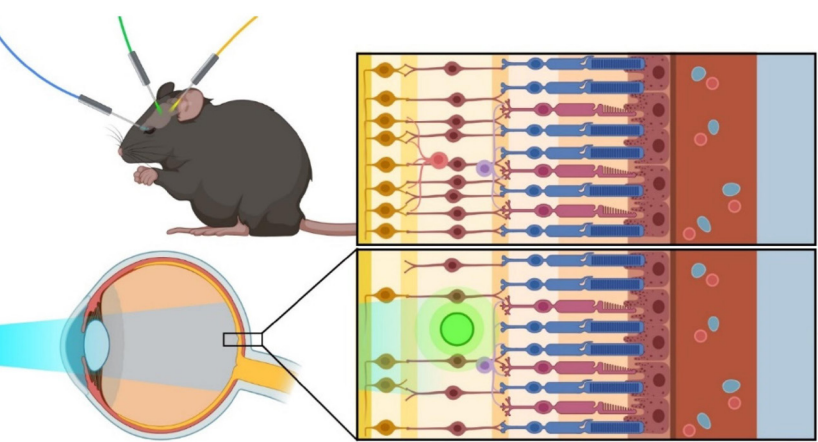

The researchers developed a new family of light-sensitive compounds called prostheses. These molecules act as a type of "molecular prosthesis", taking over part of the role normally performed by lost

photoreceptors.

Unlike some existing experimental approaches, the treatment does not require gene therapy, implanted electronic devices or specialised lighting equipment. The drugs can be delivered into the eye and, significantly, two of the most promising compounds were also effective when administered as eye drops.

The treatment works through photopharmacology, in which a drug's activity can be controlled by light. When light enters the eye, the molecules change shape and activate surviving retinal cells known as ON-bipolar neurons, helping the retina once again transmit information about light.

In tests, the compounds restored eye movements in blinded zebrafish larvae and enabled blind mice to respond naturally to differences between light and darkness. Healthy mice normally prefer darker spaces, but blind mice lose this instinct because they cannot detect light. After treatment, the

blind animals once again moved towards darker areas, showing that they could perceive light and use the information to guide their behaviour. Importantly, the effect was achieved under ordinary levels of indoor light and daylight rather than requiring unusually intense illumination. The findings remain at an early experimental stage and the treatment has not yet been proven in humans. Researchers are now studying the compounds' safety,

formulation and the duration of their effects before possible future clinical trials.

Scientists say the approach does not cure the underlying degeneration that causes blindness. However, if it eventually proves safe and effective in people, the technology could offer a simpler, non-invasive and potentially more widely accessible way of restoring useful vision for patients with advanced retinal diseases.

Long-term melatonin use linked to higher heart failure risk

Long-term use of melatonin, a popular supplement used to improve sleep, has been linked to a significantly

higher risk of heart failure among people with chronic insomnia, according to a large preliminary study. Researchers, however,

stressed that the findings do not prove that melatonin itself causes heart problems.

The study, presented at the American Heart Association's Scientific Sessions, examined five years of health records involving more than 130,000 adults with chronic insomnia. Researchers compared people whose medical records showed melatonin use for at least one year with similar patients who had no documented use of the supplement.

The analysis found that long-term melatonin users had about a 90 per cent higher risk of developing heart failure during the five-year follow-up period. Heart failure was recorded in 4.6 per cent of the melatonin group, compared with 2.7 per

cent among non-users.

A further analysis, involving people with evidence of repeated melatonin prescriptions, found an 82 per cent higher risk of heart failure, reinforcing the association observed in the main study.

Researchers also reported differences in other serious health outcomes. People in the long-term melatonin group were nearly 3.5 times more likely to be hospitalised for heart failure. Deaths from all causes were also higher, with 7.8 per cent of melatonin users dying during the study period compared with 4.3 per cent in the comparison group. Melatonin is a hormone naturally produced by the brain to regulate the body's

sleep-wake cycle. Synthetic versions are widely used to address sleep problems and jet lag and are available without prescription in several countries.

The borrower(s) are hereby advised to comply with the demand notice(s) and to pay the demand amount mentioned therein and hereinabove within 60 days from the date of this publication together with applicable interest, additional interest, bounce charges, cost and expenses till the date of realization of payment. The borrower(s) may note that **USFBL** is a secured creditor and the loan facility availed by the Borrower(s) is a secured debt against the immovable property/properties being the secured asset(s) mortgaged by the borrower(s). In the event borrower(s) are failed to discharge their liabilities in full within the stipulated time, **USFBL** shall be entitled to exercise all the rights under Section 13(4) of the Act to take possession of the secured asset(s) including but not limited to transfer the same by way of sale or by invoking any other remedy available under the Act and the Rules thereunder and realize payment. **USFBL** is also empowered to **ATTACH AND/OR SEAL** the secured asset(s) before enforcing the right to sale or transfer. Subsequent to the Sale of the secured asset(s), **USFBL** also has a right to initiate separate legal proceedings to recover the balance dues, in case the value of the mortgaged properties is insufficient to cover the dues payable to the **USFBL**. This remedy is in addition and independent of all the other remedies available to **USFBL** under any other law. The attention of the borrower(s) is invited to Section 13(9) of the Act, in respect of time available, to redeem the secured assets and further to Section 13(13) of the Act, whereby the borrower(s) are restrained/prohibited from disposing of or dealing with the secured asset(s) or transferring by way of sale, lease or otherwise (other than in the ordinary course of business) any of the secured asset(s), without prior written consent of **USFBL** and non-compliance with the above is an offence punishable under Section 29 of the said Act. The copy of the demand notice is available with the undersigned and the borrower(s) may, if they so desire, can collect the same from the undersigned on any working day during normal office hours.
